| Defect Title       | Booking completed successfully even when Passenger Name field is left blank                                                                                                                                       |
| Module             | Passenger Information                                                                                                                                                                                             |
| Reported By        | QA Tester                                                                                                                                                                                                         |
| Reported Date      | 10-Jun-2026                                                                                                                                                                                                       |
| Severity           | High                                                                                                                                                                                                              |
| Priority           | High                                                                                                                                                                                                              |
| Status             | Open                                                                                                                                                                                                              |
| Environment        | Windows 10, Chrome Browser, BlazeDemo Application                                                                                                                                                                 |
| Description        | Application allows users to complete flight booking without entering Passenger Name. Passenger Name is a mandatory field and should be validated before booking confirmation.                                     |
| Preconditions      | User should be on Purchase Flight page.                                                                                                                                                                           |
| Steps to Reproduce | <ol style="list-style-type: none"><li>1. Launch BlazeDemo application.</li><li>2. Search and select a flight.</li><li>3. Navigate to Purchase Flight page.</li><li>4. Leave Passenger Name field blank.</li></ol> |

|                 |                                                                                            |
|-----------------|--------------------------------------------------------------------------------------------|
|                 | 5. Enter remaining details.<br>6. Click Purchase Flight.                                   |
| Test Data       | Passenger Name = Blank                                                                     |
| Expected Result | System should display validation message "Passenger Name is Required" and prevent booking. |
| Actual Result   | Booking completed successfully without Passenger Name.                                     |
| Impact          | Invalid booking records can be created and stored.                                         |
| Attachment      | Screenshot of booking confirmation page.                                                   |

## BUG REPORT 2

| Field              | Details                                                                                                                |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Defect ID          | BUG_002                                                                                                                |
| Defect Title       | Credit Card Number field accepts alphabetic characters                                                                 |
| Module             | Payment Information                                                                                                    |
| Reported By        | QA Tester                                                                                                              |
| Reported Date      | 10-Jun-2026                                                                                                            |
| Severity           | Medium                                                                                                                 |
| Priority           | Medium                                                                                                                 |
| Status             | Open                                                                                                                   |
| Environment        | Windows 10, Chrome Browser                                                                                             |
| Description        | Credit Card Number field accepts alphabetic characters and special symbols, which should not be allowed.               |
| Preconditions      | User should be on Purchase Flight page.                                                                                |
| Steps to Reproduce | 1. Navizgate to Purchase Flight page.<br>2. Enter "ABCD1234" in Credit Card Number field.<br>3. Click Purchase Flight. |
| Test Data          | ABCD1234                                                                                                               |
| Expected Result    | System should accept only numeric values and display validation message for invalid input.                             |

|               |                                                  |
|---------------|--------------------------------------------------|
| Actual Result | Alphanumeric values accepted successfully.       |
| Impact        | Invalid payment information can be submitted.    |
| Attachment    | Screenshot showing invalid card number accepted. |

### BUG REPORT 3

| Field              | Details                                                                                                                                                                                               |

| Priority           | High                                                                                                                                                                                                  |
| Status             | Open                                                                                                                                                                                                  |
| Environment        | Windows 10, Chrome Browser                                                                                                                                                                            |
| Description        | System accepts expired card year and allows booking completion.                                                                                                                                       |
| Preconditions      | Purchase Flight page should be displayed.                                                                                                                                                             |
| Steps to Reproduce | <ol style="list-style-type: none"> <li>1. Navigate to Purchase Flight page.</li> <li>2. Enter valid card number.</li> <li>3. Enter expired year (2020).</li> <li>4. Click Purchase Flight.</li> </ol> |
| Test Data          | Year = 2020                                                                                                                                                                                           |
| Expected Result    | System should reject expired card information and display validation message.                                                                                                                         |
| Actual Result      | Booking completed successfully.                                                                                                                                                                       |
| Impact             | Invalid payment transactions may occur.                                                                                                                                                               |
| Attachment         | Screenshot of successful booking using expired card year.                                                                                                                                             |

## BUG REPORT 4

| Field              | Details                                                     |
|--------------------|-------------------------------------------------------------|
| Defect ID          | BUG_004                                                     |
| Defect Title       | Zip Code field accepts alphabetic characters                |
| Module             | Passenger Information                                       |
| Reported By        | QA Tester                                                   |
| Reported Date      | 10-Jun-2026                                                 |
| Severity           | Medium                                                      |
| Priority           | Medium                                                      |
| Status             | Open                                                        |
| Environment        | Chrome Browser                                              |
| Description        | Zip Code field accepts alphabets and special characters.    |
| Preconditions      | User should be on Purchase Flight page.                     |
| Steps to Reproduce | 1. Enter "ABCDE" in Zip Code field.<br>2. Complete booking. |
| Test Data          | ABCDE                                                       |
| Expected Result    | System should allow only numeric Zip Codes.                 |
| Actual Result      | Alphabetic values accepted successfully.                    |
| Impact             | Invalid address information may be stored.                  |

## BUG REPORT 5

| Field         | Details                                                    |
|---------------|------------------------------------------------------------|
| Defect ID     | BUG_005                                                    |
| Defect Title  | No error message displayed when mandatory fields are empty |
| Module        | Passenger Information                                      |
| Reported By   | QA Tester                                                  |
| Reported Date | 10-Jun-2026                                                |
| Severity      | High                                                       |

|                    |                                                                                                                   |
|--------------------|-------------------------------------------------------------------------------------------------------------------|
| Priority           | High                                                                                                              |
| Status             | Open                                                                                                              |
| Environment        | Chrome Browser                                                                                                    |
| Description        | Application allows submission even when mandatory fields are left empty and does not display validation messages. |
| Preconditions      | Purchase Flight page should be displayed.                                                                         |
| Steps to Reproduce | 1. Leave all fields empty.<br>2. Click Purchase Flight.                                                           |
| Test Data          | Empty Fields                                                                                                      |
| Expected Result    | Validation messages should be displayed for all mandatory fields.                                                 |
| Actual Result      | Booking process continues without proper validation.                                                              |
| Impact             | Poor data quality and invalid booking records.                                                                    |

## DEFECT SUMMARY

| Defect ID | Defect Title                             | Severity | Priority | Status |
|-----------|------------------------------------------|----------|----------|--------|
| BUG_001   | Passenger Name field allows blank values | High     | High     | Open   |
| BUG_002   | Credit Card Number accepts alphabets     | Medium   | Medium   | Open   |
| BUG_003   | Expired Card Year accepted               | Medium   | High     | Open   |
| BUG_004   | Zip Code accepts alphabets               | Medium   | Medium   | Open   |
| BUG_005   | No validation for mandatory fields       | High     | High     | Open   |
